

Let's add to what we know.

Participate in research to fight the pandemic.

We are recruiting participants for a research study to learn more about how people living in rural areas get COVID-19 and what type of illness they may have.

Why should I join?

- COVID-19 continues to be a public health problem in rural communities.
- With your help, we can learn how to prevent the spread of COVID-19 in rural communities like ours.
- You may find out if you have COVID-19 or influenza.

Who can join?

Anyone who lives in or around the Marshfield area may be eligible to participate.

What do I have to do for the study?

- You would need to answer some questions every week for 52 weeks.
- You would need to collect a nose sample (from inside the front of your nose) and mail the sample to us, if requested. You may be asked to collect a nose sample every week for 26 weeks, or only if you feel sick.
- You would need to come to Marshfield Medical Center (medical offices) in Marshfield for at least 3 blood draws, some people will be asked to provide up to 3 more blood samples.
- You will not receive any treatments or vaccines.

How can I join or get more information?

- Visit www.marshfieldresearch.org/pacc
- Call us at 800-468-9700
- Email us at pacc@marshfieldresearch.org

This study is being conducted by Marshfield Clinic Research Institute and funded by the U.S. Centers for Disease Control and Prevention (CDC).

You will be paid for your time. You may receive between \$358 and \$644, depending on which study activities are done.

Timeline of study events

Before the first visit: You will answer questions online or by phone

Study Week

• *Each week you will:* Answer a few questions and collect a nose sample, if requested, over a period of 52 weeks.

At the first visit (Week 1)

We will:	<ul style="list-style-type: none">• Answer your questions• Ask you a few questions• Teach you how to collect a nose sample
You will:	<ul style="list-style-type: none">• Collect a sample from your nose• Provide a blood sample

Second visit (Week 12)

You will:	Come to the clinic and provide a blood sample.
------------------	--

Third visit (Week 24)

You will:	Come to the clinic and provide a blood sample.
------------------	--

End of study (Week 52)
