2019 Child Agricultural Injury Prevention Workshop
Preliminary Agenda
Lexington, KY

Purpose: Increase knowledge and awareness of agricultural child injuries and extend the reach and dissemination of childhood agricultural injury prevention (CAIP) strategies and resources.

Desired Outcome: Participants will increase their knowledge of childhood agricultural safety strategies and resources. They will use this information and resources to develop and enhance their organization’s child agricultural injury prevention efforts.

Learning Objectives
In relation to child agricultural injury prevention, participants will be able to
- Describe the burden of injuries and fatalities
- Identify the benefits of participating in safety efforts for their organization
- Identify resources and organizations that can work together to promote farm safety
- Develop a network of peers committed to injury prevention to serve as potential partners/resources
- Recognize effective policies and strategies their organizations can implement
- Develop a plan for their organization to assist with promotion/dissemination of child safety resources
