

## POSITION ANNOUNCEMENT

### *National Farm Medicine Center - Marshfield Clinic Research Institute*

#### **Associate Research Scientist *or*\* Research Scientist**

##### **Position Summary**

The Associate Research Scientist or Research Scientist maintains and conducts a high quality research program, relevant to the area of agricultural health and safety, rural health, and or environmental/occupational health, assisting NFMC in achieving the organizational goals and results within the Marshfield Clinic Research Institute (MCRI). This scientist or clinician-scientist should maintain a strong and consistent record of scientific discovery and he/she will secure externally funded research awards, collaborate with scientists and clinician investigators, and implement translation of their research throughout Marshfield Clinic Health System (MCHS) and beyond. *\*The successful candidate may be hired as an Associate Research Scientist or Research Scientist based on qualifications and experience.*

The Associate Research Scientist or Research Scientist in this tenure track position will conduct independent, original, applied (translational) research in agricultural safety and health. Expectations include: publish research results in peer-reviewed journals and books; compete successfully for extramural funding; collaborate and consult with [National Farm Medicine Center](#) (NFMC) and Marshfield Clinic Research Institute (MCRI) scientists, Marshfield clinician investigators, and external scientists. This individual is expected to be involved in national and international scientific endeavors, including peer-review mechanisms, and presentations at professional conferences. Options to participate in currently funded programs within the NFMC, the NIOSH-funded [National Children's Center for Rural and Agricultural Health and Safety](#) and/or, the [Upper Midwest Agricultural Safety and Health Center \(UMASH\)](#) are available.

The preferred candidate will have education in a field such as agricultural health and safety, occupational medicine, epidemiology, public health, behavioral health, social sciences, occupational safety, environmental health, mental health/psychology, agricultural engineering, or a related field, and experience in the areas of rural/agricultural health and safety. Physicians/clinicians are encouraged to apply and clinical time will be an option the hiring committee will consider. Especially strong candidates will be considered for an endowed research opportunity.

##### **Job Qualifications – Associate Research Scientist**

Education: Educational qualifications must be from an institution whose accreditation is recognized by the Council for Higher Education and Accreditation. Minimum Required: Doctorate in clinical discipline (MD, DO, DDS, DMD etc.) or philosophy (PhD) or equivalent in scientific field relevant to the area of hire.

##### Experience

- Minimum Required: Two years' experience in research activities relevant to the area of hire (may include doctoral thesis or other research conducted during a postgraduate program). Demonstrated proficiency with scientific methods and software relevant to the area of hire. Documented original research publications in peer-reviewed, National Library of Medicine (NLM) indexed journals, including publications where the applicant is listed as first author.
- Preferred/Optional: Expertise in research areas currently generating external funding for center investigators. Demonstrated proficiency in securing extramural funding for research projects. Experience serving as a Principal Investigator and leading research teams.

##### **Job Qualifications – Research Scientist**

Education: Educational qualifications must be from an institution whose accreditation is recognized by the Council for Higher Education and Accreditation. Minimum Required: Doctorate in clinical discipline (MD, DO, DDS, DMD etc.) or philosophy (PhD) or equivalent in scientific field relevant to the area of hire.

## Experience:

- Minimum Required: Five years' experience in research activities relevant to the area of hire and rank (may include doctoral thesis or other research conducted during a postgraduate program). Demonstrated proficiency in securing extramural funding for research projects. Proven ability to plan and execute applied/translational research. Established proficiency with scientific methods and software relevant to area of hire. Documented original research publications in peer-reviewed, National Library of Medicine (NLM) indexed journals, including publications where the applicant is listed as first and/or last author. Verified accomplishments in discovery, receipt and management of extramural grants and/or contracts, commensurate with rank.

## **Community Information**

[Marshfield](#) is a city of nearly 20,000 with excellent public and private schools, many recreational opportunities, and a strong sense of community. Marshfield has a satellite campus of the University of Wisconsin–Stevens Point and many faculty hold adjunct appointments at UW Madison, University of Minnesota and other universities.
